accessories	ARC link, to link multiple ARCs
customization	printable, exchangeable banner, stickering

## Measurements

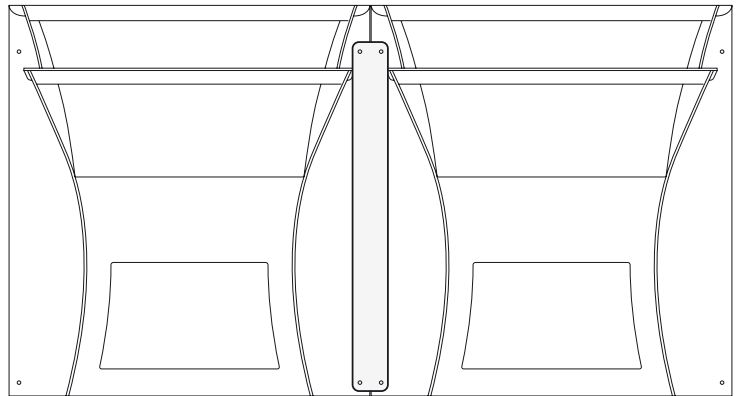

## LINK SETS FOR FLUX ARC

### LINK 180

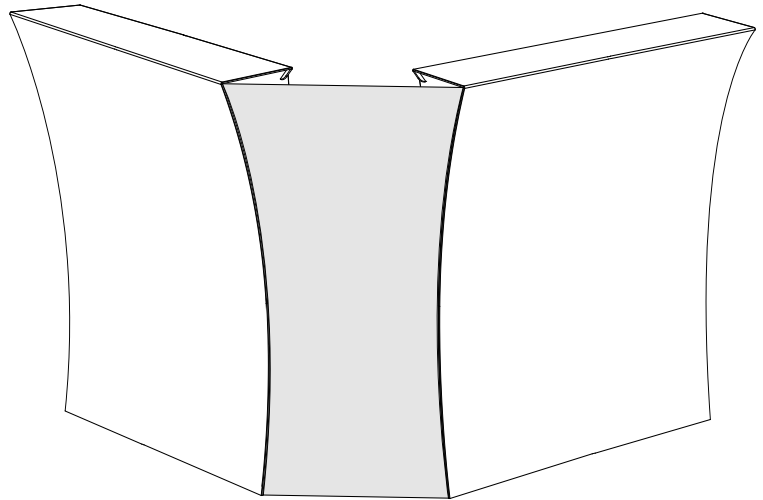

It's possible to connect the ARC's to form one long bar. The ARC link set holds the bars firmly together and also closes the small gap in between the bars.

The box includes the connecting strip with four holes, four threaded rods with wing nuts and a manual.

### LINK 90

This link set is intended to link the ARC's in a 90 degree corner. This way it's possible to create a square or rectangular bar.

## EXCHANGEABLE BANNER FOR FLUX ARC

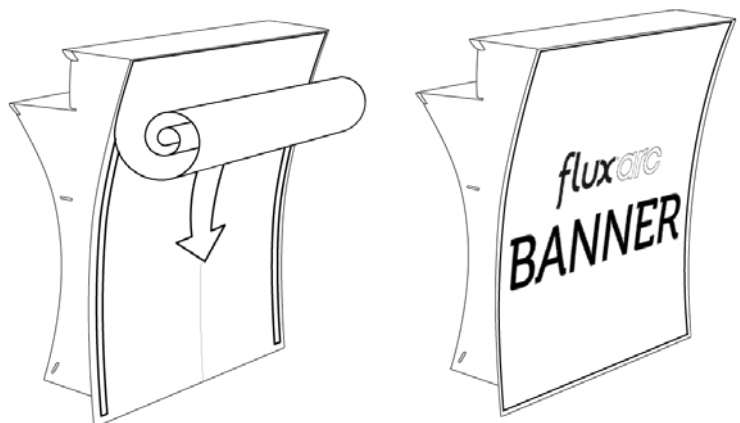

The flux ARC exchangeable banner is the perfect solution if you want to be able to change the print on the ARC bar. The panels are printed on a state of the art flatbed printer which results in superb quality.

The banners are attached with velcro and are easy to position.

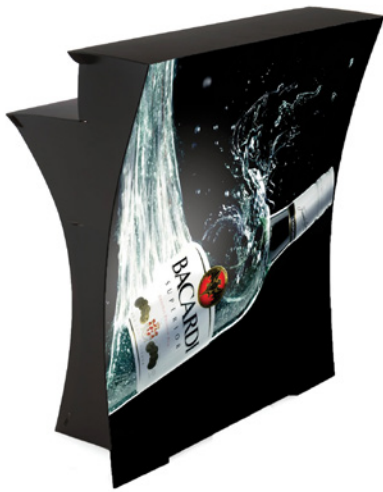

The box includes one roled up banner, velcro strips to put on the bar (the ones on the banner are already applied) and a manual.

### INSTRUCTIONS

Please provide the graphic in the following dimensions: w 100 x h 110 cm per ARC. Minimal advised resolution: 150 dpi.

Of course it's possible to use a single flux ARC with a banner but it's also possible to use the ARC link to link multiple ARC's and then use one banner to cover the complete surface.

## BAG FOR FLUX ARC

The flux ARC carrying bag can be used to safely store and carry up to 3 ARC's including the link sets. Note that the total weight of 3 ARC's is almost 50 kg, therefore in that case we advise to carry the bag with two people, the bags are fitted with two extra handles on the top corners to facilitate this.

This bag is also suitable for the flux tablet tower.

## PRICELIST ARC SYSTEM

Item	Description	Price in EURO (ex. VAT)
